ELECTROLYSIS

Electric hair removal has been around for over 150 years. It is a proven and scientifically recognized method worldwide, demonstrated to be effective in all treatments targeting hair follicles. It is the only method that offers 100% permanent hair removal by completely destroying hair follicles and ensuring no regrowth.

In addition, the electric hair removal technique is THE complementary and essential solution to photoepilation treatments.

EVOLUTION ST350 operates at a single frequency of 6.78 MHz, which is both efficient and regulated by the US FCC (Radio Frequency Family), and is recognized by electrologists worldwide.

EASY TO USE

EVOLUTION ST350 offers the exclusive combination of High Definition Vector Modulations at the effective frequency of 6.78 MHz

“Whether you are an experienced electrologist or not, this new device, featuring the latest technology, will allow you to treat all hair types and colors, all areas of the body and face, and all phototypes with no seasonal constraints.”

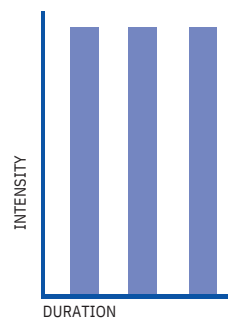

VECTOR MODULATIONS

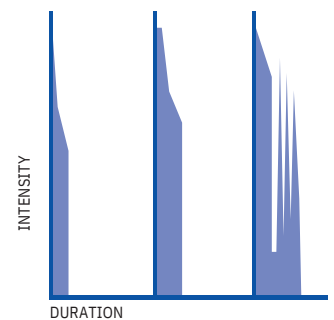

Unlike conventional devices that transmit a constant and uncomfortable electric current, EVOLUTION ST350 enhances results, concentrates energy, and reduces discomfort thanks to Silhouet-Tone's exclusive Vector Modulations technology.

This technology modulates the duration, shape, and intensity of the current in ultra-fast decreasing sequences. During treatment, it reduces the discomfort associated with electrolysis while preserving the skin's surface.

Traditional Modulations

EVOLUTION ST350 Vectorial Modulations

ADVANTAGES

EVOLUTION ST350 ensures comfort during treatment by optimizing energy, resulting in faster and more efficient results !

EVOLUTION ST350 offers a complete range of pre-programmed, adjustable and customizable programs whether in Thermolysis, Blend or in Electrolysis.

EVOLUTION ST350: the essential complementary solution to Laser and IPL treatments.

- Treatment of the depigmented hairs such as red, white, gray, blonde, or very fine hairs that Laser and IPL cannot target
- Hair removal in areas that are inaccessible or contraindicated for photoepilation
- A crucial complement to Laser and IPL as it ensures the finalization of results and achieves 100% permanent hair-free outcomes year-round

400 programs

- 7 facial areas
- 9 body areas
- 5 hair sizes
- 3 working modes

FEATURES

- High-resolution touchscreen
- Intuitive navigation
- Easy parameter management
- Total customization: Amplitude and time
- Pre and post-treatment: Anaphoresis and Cataphoresis
- 2 integrated timers: Real-time and timer for precise treatment duration management
- Option to work with or without a pedal
- Integrated interactive instruction manual
- Modern and robust design

ACCESSORIES

2 ergonomic probe holders,
2 lengths (short and long)

1 comfortable and flexible
biocompatible return electrode

1 red extension cable

1 satellite 2 High Tech LED

1 pedal (T-91-S) with integrated
shock absorber

1 black extension cable

1 pre and post-treatment roller

1 stylus pen for simple and
easy screen operation

TECHNICAL DETAILS

Screen:	10.1 inch touch screen (25.654 cm)
Certifications:	CSA, FCC, FDA and CE
Power supply:	110-240V / 50-60Hz – 1.7A
Device dimensions:	Width: 10.3 inch (262 mm) Height: 6.5 inch (164 mm) Depth: 14.7 inch (374 mm)
Weight of the device:	11.5 Pounds (5.2 Kg)
Construction:	Metal housing
Electronic:	Microprocessor controlled
Permissible ambient temperature:	+10°C to +40°C
Permitted relative humidity:	0% to 80% non-condensing
